

Hobart High School

Presents our Science Community
Lecture

Alina Ivan "Mastering Memory" Science Lecture

Thursday 12 May 2022

Raffle and Refreshments 6.30pm

Lecture 7.00pm to 8.00pm

Can you trust your memories? Maybe not. In this interactive science show students learn how memories stored in the brain can play tricks on you, through a series of memory games and quizzes. Alina will also share top memory tips and explore psychology and neuroscience research that can help boost your learning and revision skills. Plus there will be plenty of time to ask Alina any questions you might have about your incredible brain!

When not delivering Braintastic! Science shows, Alina works with Augmentive, a mental health start-up, and as a researcher at the Institute of Psychiatry, Psychology and Neuroscience, King's College London. She is passionate about mental health research, cognition, media and science communication as well as art-science collaborations.

"Mastering Memory" Science Lecture
